Spot the impacts, engage in action

GERMAN TECHNICAL COOPERATION, PHILIPPINES

Reducing Flood Risks

Earth Observation and GIS communities fighting the climate crisis

Why

As Climate Change is causing more rain and flooding, land cover maps will serve as basis for interventions reducing the water flow and improve land use planning.

What for

- Establish flood early warning systems.
- Enable the population at risk to take action before a flood hits
- Produce and update land cover maps of six watershed areas.

Where

Philippines: Eastern Visayas

Who

Team

- Environment, Natural Resource and Rural Development for the Philippines

Planet Action is a non-profit initiative launched by Spot Image and joined by participating partners.
